1 SUMMARY

Project E-HOLDUP is a criminal investigation into a series of smash-and-grab armed robberies targeting independent jewelry stores in the Surrey and Delta area of British Columbia. Between April 26, 2025, and May 27, 2025, six confirmed armed robberies and one suspicious circumstance were recorded under Surrey Police Service file 2025-559501. All robberies occurred during a consistent midday window between 12:40 and 15:20hrs, averaging once every 4.2 days, suggesting an organized and deliberate operation. The incidents were concentrated along the Scott Road corridor across zones SU1, SU3 and DEL, targeting small independent jewelry stores located within strip malls where lone employees were working. One location, Kam's Jewelry and Watches at 9210 Scott Road, Surrey, was targeted twice — on April 26 and May 20, 2025. Based on accumulated intelligence and investigative findings, the primary suspects are assessed to be Conrad SMITH (alias: Smokey), William VARGAS (alias: Bill), Jimmy SANDHU (alias: GMoney) and Maxwell HAWG, with additional associates playing supporting roles. The purpose of this report is to consolidate all intelligence and investigative findings to date, analyze suspect associations and methods of operation, identify investigative gaps, and provide actionable recommendations for next steps.

2 SUSPECT PROFILES

2.1 Conrad SMITH (Primary Suspect)

Conrad SMITH, also known by his alias "Smokey," is assessed to be the primary suspect and gunman in the Project E-HOLDUP robbery series. SMITH was born on May 2, 1987, and resides at 10660 137 Street, Surrey, BC (SMITH, Conrad Profile). He is described as a Caucasian male, 191 cm tall, 97 kg, with brown hair worn shaved, brown eyes, and notable tattoos including skulls on his left hand and a full sleeve on his right arm (SMITH CPIC Printout). SMITH is currently subject to several CPIC conditions including a lifetime firearms prohibition, a curfew between 2300 and 0600hrs, and a no direct or indirect contact order with Matthew THOMPSON (SMITH, Conrad Profile).

SMITH's physical description is consistent with Suspect 1 described across all six robbery reports: tall, thin, Caucasian male dressed in black, carrying a firearm. His registered vehicle, a blue 2022 Dodge Ram pickup bearing licence plate 5555AAA, was observed at multiple locations relevant to this investigation and the partial plate "AAA" was noted by a witness fleeing Robbery 6 at Kam's Jewelry on May 20, 2025 (Robbery 6 Report, File 559501). On May 5, 2025, SMITH was identified via traffic stop by Constable BLACK after departing The Vault at 4277 Main Street, Vancouver, carrying a blue backpack consistent with the backpack described by victim Cindy KAM in Robbery 1 (Surveillance Report, 2025-05-05). SMITH falsely claimed to be employed at a jewelry store during this stop he has no listed employer (SMITH, Conrad Profile; Surveillance Report, 2025-05-05).

Assessed role: Primary gunman and coordinator of robbery crew.

2.2 William VARGAS (alias: Bill)

William VARGAS, also known as "Bill," is assessed to be the recruiter and a secondary armed participant in the robbery series. VARGAS was born on May 2, 1977, and is believed to reside on Semiahmoo Road, Surrey, based on intelligence reporting (Intel Report B12345, May 1, 2025). He is contactable at phone number 778-990-4578 (SMITH, Conrad Profile).

Intelligence reporting assessed as Reliable confirms that VARGAS visited SMITH's residence at 10660 137 Street to obtain a firearm prior to the robbery series (Intel Report B12345, May 2, 2025). The same reporting identifies VARGAS as the individual responsible for recruiting Jimmy SANDHU into the robbery crew, a fact further corroborated by the suspicious circumstance report of May 27, 2025, in which a female was overheard stating "Bill did a good job recruiting him" (Suspicious Circumstance Report, File 560007). VARGAS is also confirmed as dealing cocaine based on intelligence reporting, suggesting involvement in broader criminal activity beyond the robbery series (Intel Report B12345, May 1, 2025).

Assessed role: Recruiter and armed participant.

Information contained herein is CONFIDENTIAL and intended for law enforcement personnel only. Third Party Rule: Please contact the author prior to using this material.

2.3 Jimmy SANDHU (alias: GMoney)

Jimmy SANDHU, known by the alias "GMoney," is assessed to be the hammer man responsible for smashing display cases and collecting jewelry during the robberies. SANDHU was born on June 1, 2004, making him approximately 20 years of age at the time of the offences. He is contactable at 778-863-6882 and is the twin brother of Harj SANDHU (SMITH, Conrad Profile).

Intelligence reporting assessed as Reliable identifies SANDHU as the individual who smashes display cases with a hammer and takes the jewelry during robberies (Intel Report B12345, May 1, 2025). His physical description approximately 5'6", stocky build, South Asian male with very short black hair is consistent with Suspect 2 described across multiple robbery reports and victim statements (Robbery 1 Report, File 543011; Victim Statement, Cindy KAM). An unknown male observed with MCNEIL and THOMPSON during surveillance on May 8, 2025, described as approximately 5'6", stocky, South Asian, 17–20 years of age, is assessed to be Jimmy SANDHU (Surveillance Report, 2025-05-08). SANDHU's presence in the vehicle on May 8 three hours before Robbery 4 supports the assessment that he participated in pre-operational reconnaissance prior to that robbery.

Assessed role: Hammer man smashes display cases and collects stolen jewelry.

2.4 Sheila MCNEIL

Sheila MCNEIL, born October 5, 1986, is the girlfriend of Conrad SMITH and is assessed to be the getaway driver and pre-operational reconnaissance operative for the robbery crew. She is contactable at 604-899-5526 (SMITH, Conrad Profile).

Witness Sukhdeep BRAR observed a female driver in the blue pickup following Robbery 1, describing her as having very pale skin, a large nose, and long, very straight black hair — a description consistent with MCNEIL's known profile (Witness Statement, BRAR, File 543011). MCNEIL was directly observed operating SMITH's vehicle, BCL 5555AAA, during surveillance on May 8, 2025 (Surveillance Report, 2025-05-08). On that date, MCNEIL met with Matthew THOMPSON and an unknown male, attended Smith's House of Gold at 128 Street and 96 Avenue, assessed as pre-operational reconnaissance — and was last observed driving southbound on Scott Road approximately three hours before Robbery 4 occurred (Surveillance Report, 2025-05-08; Robbery 4 Report, File 544984). A suspicious female matching MCNEIL's description was also reported entering target stores prior to Robberies 2 and 4, further supporting her role in reconnaissance (Robbery 2 Report, File 544441; Robbery 4 Report, File 544984).

Assessed role: Getaway driver and pre-operational reconnaissance operative.

2.5 Maxwell HAWG

Maxwell HAWG, born August 21, 1979, resides at 4277 Main Street, Vancouver, BC, and is the registered President and sole director of Gold Exchange BC Ltd., incorporated November 1,

Information contained herein is CONFIDENTIAL and intended for law enforcement personnel only. Third Party Rule: Please contact the author prior to using this material.

2023 (BC Corporate Registry Search). He operates a black 2025 Hummer H2 bearing licence plate FFNE727, registered to Gold Exchange BC Ltd. (Surveillance Report, 2025-05-05).

HAWG is flagged as a Special Interest Police individual and known associate of the Demon Riders Outlaw Motorcycle Gang, with prior convictions including aggravated assault, break and enter, and possession of stolen property (HAWG, Maxwell Profile).

HAWG is assessed to be the primary fence for stolen jewelry obtained during the robbery series. Gold Exchange BC Ltd. is registered as an import/export company — a business type conducive to moving stolen goods — and operates three subsidiaries: Cashfast Money Exchange at 12605 124 Street, Surrey; The Vault at 4277 Main Street, Vancouver; and Hawg Wyld Custom Bikes Ltd. at 20801 Langley Bypass, Langley (BC Corporate Registry Search). Cashfast Money Exchange is of analytical interest as a cash exchange business is a known vehicle for money laundering. On May 5, 2025, HAWG was observed opening The Vault, where he subsequently met with SMITH for approximately four hours (Surveillance Report, 2025-05-05). HAWG and SMITH share the phone number 604-222-5555, listed as a work phone for both individuals, further suggesting an undisclosed operational relationship (SMITH, Conrad Profile; HAWG, Maxwell Profile).

Assessed role: Fence for stolen jewelry and head of criminal organization.

2.6 William TIDERINGTON (alias: Twinkie)

William TIDERINGTON, also known as "Twinkie," was born April 5, 1973, and is listed as an associate of Maxwell HAWG (HAWG, Maxwell Profile). TIDERINGTON is assessed to be the middleman responsible for connecting the robbery crew to buyers of stolen jewelry. On May 27, 2025, an individual at the Big Ridge Brew Pub was overheard stating that "Twinkie was good shit" and that he "connected them to the right people" to move stolen goods, directly identifying TIDERINGTON's role within the network (Suspicious Circumstance Report, File 560007).

Of analytical significance, phone number 604-784-1526 is listed under TIDERINGTON in HAWG's profile and under Harj SANDHU in SMITH's profile (SMITH, Conrad Profile; HAWG, Maxwell Profile). This overlap represents a significant investigative gap — it is unclear whether these are the same individual, whether the phone is shared, or whether it is a burner device passed between associates.

Assessed role: Middleman - connects robbery crew to buyers of stolen goods.

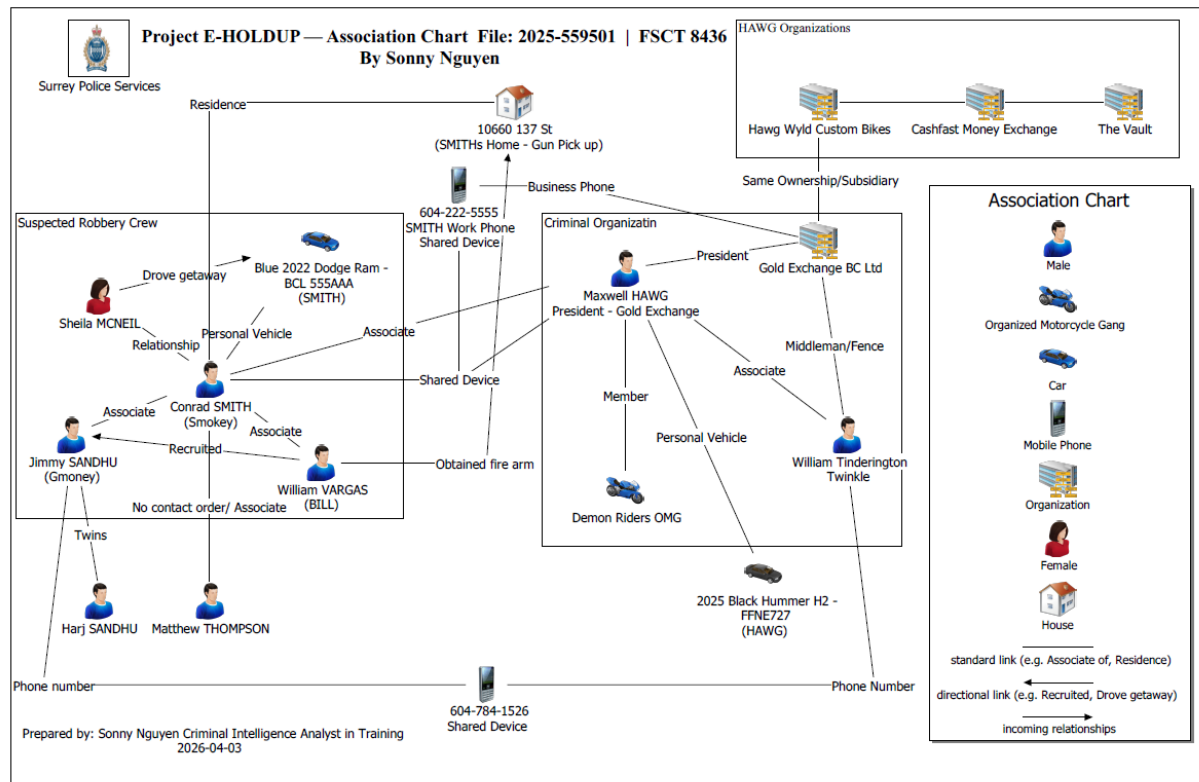

Figure 2 Association Chart

3 MODUS OPERANDI(MO)

At Smith's House of Gold there would be typical pre-operational reconnaissance lasting around three hours before any robbery operation. This is confirmed by the May 8, 2025 surveillance report which confirms MCNEIL's cooperation within these operations (Surveillance Report, 2025-05-08). This pattern is further supported by witness accounts describing a suspicious female matching MCNEIL's description entering target stores prior to Robberies 2 and 4 (Robbery 2 Report, File 544441; Robbery 4 Report, File 544984).

During the operations, MCNEIL acted as the getaway driver of the blue 2022 Dodge Ram with BCLP 5555AAA (Surveillance Report, 2025-05-08; SMITH CPIC Printout). This is further corroborated by witness BRAR who observed a female driver matching MCNEIL's description fleeing the scene of Robbery 1 in a blue pickup truck (Witness Statement, BRAR, File 543011).

Following each robbery, stolen goods were assessed to move through HAWG's Gold Exchange BC Ltd. network, with TIDERINGTON acting as middleman (Suspicious Circumstance Report, File 560007; BC Corporate Registry Search).

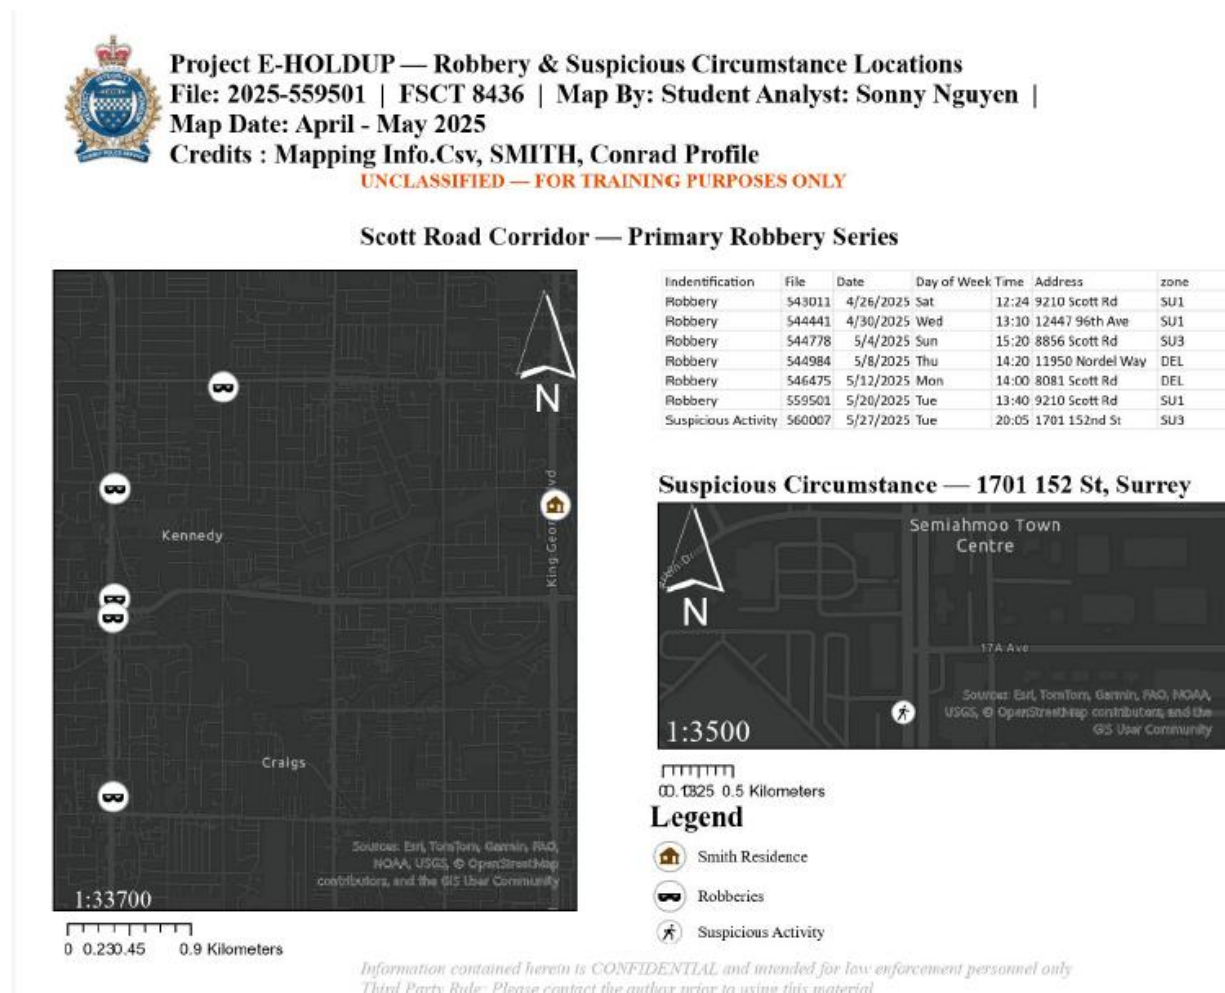

4 Incident Analysis

4.1 Location

Information contained herein is CONFIDENTIAL and intended for law enforcement personnel only. Third Party Rule: Please contact the author prior to using this material.

Location analysis of the robbery series reveals that five of the six confirmed robberies occurred within the Scott Road corridor, spanning approximately 4.5 kilometres from SMITH's confirmed residence at 10660 137 Street, Surrey (SMITH, Conrad Profile; Mapping Info). Notably, Kam's Jewelry and Watches at 9210 Scott Road, Surrey was targeted twice on April 26, 2025 (File 543011) and again on May 20, 2025 (File 559501) indicating deliberate repeat victimization of a familiar target. This pattern suggests the suspects assessed the location as low-risk following the initial robbery. The proximity of the robbery series to SMITH's residence further supports his assessed involvement as a primary suspect. A suspicious circumstance (File 560007) recorded on May 27, 2025 at 1701 152 Street, Surrey occurred in a geographically distinct zone (SU3), approximately 15 kilometres south of the primary series area, and notably occurred at 20:05hrs the only incident in the series to occur after dark. This geographic and temporal separation suggests either suspect surveillance of a new target area or unrelated activity. Reference ArcGIS map Figure 3.

Figure 3: Project E-HOLDUP- Map

Information contained herein is CONFIDENTIAL and intended for law enforcement personnel only. Third Party Rule: Please contact the author prior to using this material.

4.2 Temporal Analysis

Temporal analysis of the robbery series indicates a consistent operational pattern among the suspects. All six robberies occurred between 12:40hrs and 14:00hrs, reflecting a deliberate targeting of the midday window when store owners are more likely to be absent and lone employees are on shift (Robbery Reports 1–6, Files 543011–559501). This is corroborated by multiple victim accounts confirming they were working alone at the time of the robbery (Victim Statement KAM, File 543011; Robbery Report File 544441). The peak occurrence was between 13:00hrs and 14:00hrs, accounting for four of the six robberies. With respect to Day of week, the robberies were distributed across six different days with no single dominant day identified, suggesting the suspects prioritize target conditions over a fixed schedule. The sole nighttime incident the suspicious circumstance at 1701 152 Street on May 27, 2025 at 20:05hrs (File 560007) is temporally distinct from the robbery series and may indicate a shift in operational behaviour or planning activity. Reference Figure 4 Robberies by Time of Day and Figure 5 Robberies by Day of Week.

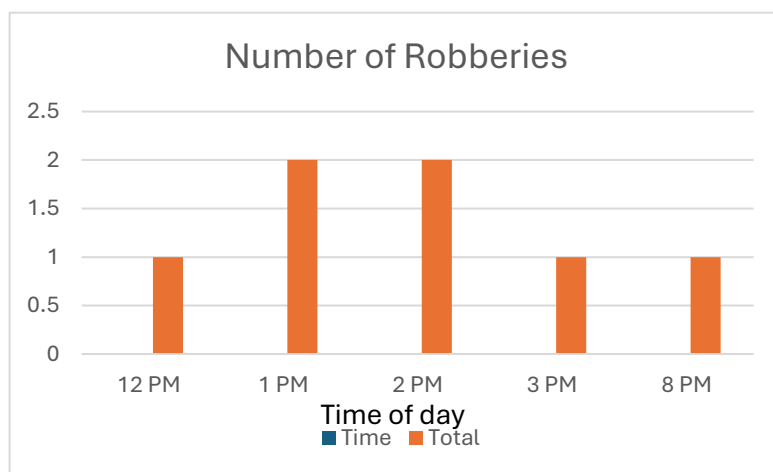

Figure 4 Robberies by Time of Day

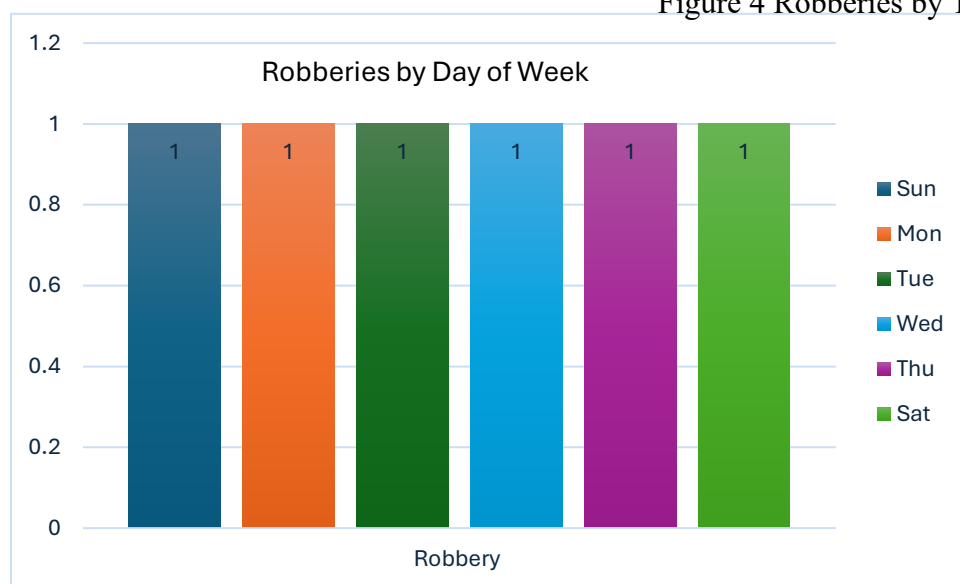

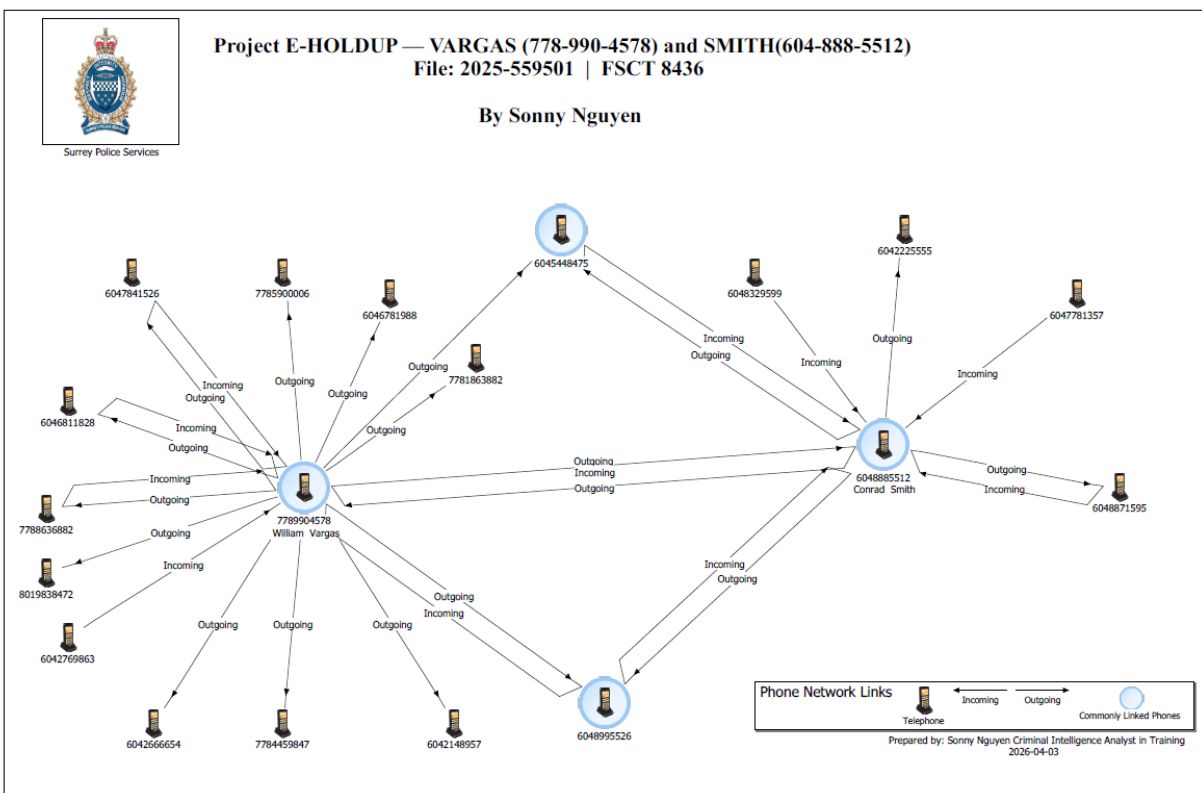

Figure 5 Robberies by Day of Week

4.3 Phone Records Analysis

Analysis of the SMITH (604-888-5512) and VARGAS (778-990-4578) phones was conducted through i2 Analyst's Notebook and is represented in Figure 6: Network of Calls. The VARGAS phone was identified as the central node within the communications network, maintaining the highest volume of calls and greatest number of unique contacts, consistent with his assessed role as crew recruiter and coordinator (Phone Records — VARGAS; Intel Report B12345, May 2, 2025). Direct bidirectional communication between the SMITH and VARGAS phones was confirmed, with both incoming and outgoing calls recorded across the dataset. A common number identified within the analysis was 604-222-5555, a phone shared by primary suspect Maxwell HAWG and registered to Gold Exchange BC Ltd., further corroborating the assessed operational link between the robbery crew and the suspected fencing network (SMITH Profile; HAWG Profile; Gold Exchange BC Ltd. Company Profile). Two additional common contacts: 6048995526 and 6045448475 were identified as shared between both the SMITH and VARGAS phones. The unknown identities of these numbers represent investigative gaps requiring further analysis. Geographic analysis of cell site data around confirmed robbery dates is recommended as a priority investigative step to further establish suspect locations during the series.

5 Intelligence Assessment

Two intelligence reports were produced from source B12345, debriefed by Cst. J. SMITH of the Surrey Police Criminal Intelligence Section on May 1 and May 2, 2025 (Files 2025-5620 and 2025-7876). The source provided information rated at varying reliability levels : Reliable (R), Believed Reliable (BR), and Unknown Reliability (UR). Assessment of the intelligence against subsequent investigative findings indicates a high degree of accuracy among R and BR rated items. Specifically, the source's identification of VARGAS and THOMPSON as involved in jewelry robberies (R), confirmation that GMoney smashes display cases with a hammer (R), and identification of a blue pickup as the getaway vehicle (BR) were all subsequently corroborated through surveillance, victim statements and physical evidence (Surveillance Reports May 5 and May 8, 2025; Robbery Reports Files 543011–559501). The source's identification of VARGAS's surname (BR) and his attendance at SMITH's residence to obtain a firearm (R) were further corroborated through suspect profiles and intel cross-referencing (SMITH Profile; VARGAS Profile). Items rated UR, including SMITH's possession of an AR-15 and Jimmy SANDHU having a twin involved in robberies, remain unconfirmed and constitute investigative gaps requiring follow-up. Overall, source B12345 is assessed as reliable based on the consistent accuracy of their reporting within this file. A Crimestoppers tip was also received and is assessed as unknown reliability pending corroboration with existing evidence.

6 Investigative Gaps

Within Project E-HOLDUP, several investigative gaps were identified that require further follow-up to advance the investigation.

The first gap concerns the identity of Unknown Male #1 (UM#1) observed on May 8, 2025 during surveillance at the KFC on King George Highway and subsequently at Smith's House of Gold (Surveillance Report, May 8, 2025). UM#1 is assessed to be Jimmy SANDHU based on physical description :South Asian, short and stocky, approximately 17–20 years of age with a short buzz cut; however, this has not been confirmed (Figure 2 Association Chart). Photographic evidence was obtained during surveillance and submission for identification is recommended.

The second gap relates to the role of Matthew THOMPSON within the robbery series. THOMPSON is subject to a court-ordered no-contact condition with SMITH yet was observed in direct association with MCNEIL and UM#1 on May 8, 2025, constituting a breach of his conditions (Surveillance Report, May 8, 2025; SMITH CPIC). His precise role within the robbery series or any planned criminal activity remains unclear. It is further assessed that THOMPSON may correspond to one of the unidentified phone numbers appearing prominently within the SMITH and VARGAS communications network, however this has not been confirmed and warrants further analysis (Figure 6 Network of Calls).

Information contained herein is CONFIDENTIAL and intended for law enforcement personnel only. Third Party Rule: Please contact the author prior to using this material.

The third gap concerns the disposition of stolen jewelry. While it is assessed that stolen goods are being funnelled through HAWG's network specifically Gold Exchange BC Ltd. and its subsidiaries Cashfast Money Exchange and The Vault the precise method of disposal remains unknown (BC Corporate Registry; Suspicious Circumstance Report, File 560007). It has not been determined whether the jewelry is being resold through legitimate jewelers, sold online, exported internationally through HAWG's import/export network, or laundered through Cashfast Money Exchange. A financial investigation into Gold Exchange BC Ltd. and its subsidiaries is recommended to trace the flow of stolen goods and proceeds.

Additionally, SMITH's relationship with Gold Exchange BC Ltd. warrants further investigation. Despite having no listed employer, SMITH shares a work phone number 604-222-5555 with HAWG, which is registered to Gold Exchange BC Ltd. (SMITH Profile; HAWG Profile; BC Corporate Registry). SMITH was further observed spending approximately four hours at The Vault with HAWG on May 5, 2025, claiming to police that he was leaving work at a jewelry store. A statement that is unverified and assessed as false (Surveillance Report, May 5, 2025). SMITH's precise role within HAWG's corporate structure has not been established and constitutes a significant investigative gap.

Finally, the results of the DNA analysis from the blood sample collected by the Forensic Identity Section at the scene of Robbery 6 on May 20, 2025, are outstanding (Robbery Report, File 559501). If a DNA profile is obtained and matched to a known offender through the National DNA Databank, this would constitute direct physical evidence linking a suspect to the robbery series and could be pivotal to any future prosecution.

7. Recommendations

Based on the analysis conducted within Project E-HOLDUP, the following recommendations are submitted for consideration by the investigative team.

The first recommendation is that arrest warrants be obtained for Conrad SMITH, William VARGAS and Jimmy SANDHU. Based on the accumulated evidence from surveillance, victim and witness statements, partial plate confirmation and corroborated intelligence, there is sufficient grounds to lay charges in connection with the robbery series (Robbery Reports Files 543011–559501; Surveillance Reports May 5 and May 8, 2025; Intel Reports Files 2025-5620 and 2025-7876).

The second recommendation is that search warrants be obtained for two addresses. The first is SMITH's residence at 10660 137 Street, Surrey, where investigators may expect to locate firearms including a suspected AR-15 reported by source B12345 stolen jewelry and the blue backpack observed in SMITH's possession during surveillance on May 5, 2025 (Intel Report File 2025-5620; Surveillance

Information contained herein is CONFIDENTIAL and intended for law enforcement personnel only. Third Party Rule: Please contact the author prior to using this material.

Report May 5, 2025). The second address is 4277 Main Street, Vancouver — known as The Vault, a subsidiary of Gold Exchange BC Ltd. registered to HAWG, which is assessed as a likely storage location for stolen goods prior to resale or export (BC Corporate Registry; Surveillance Report May 5, 2025).

The third recommendation is that subscriber information and cell site data be obtained for the SMITH and VARGAS phone numbers. Analysis of the communications network identified several commonly linked numbers whose identities remain unknown (Figure 6 Network of Calls). Obtaining subscriber data would allow investigators to identify whether these numbers belong to current suspects or additional unknown associates, and cell site data would allow geographic analysis of call locations around robbery dates.

The fourth recommendation is that Matthew THOMPSON be arrested for breach of his court-ordered no-contact conditions with SMITH. THOMPSON was directly observed in association with MCNEIL and Unknown Male #1 on May 8, 2025, in clear violation of his CPIC conditions (Surveillance Report May 8, 2025; SMITH CPIC). His arrest would provide an opportunity for a formal interview regarding his role in the robbery series and any planned criminal activity.

The fifth recommendation is that surveillance be established immediately at Spence Diamonds in Langley, BC. On May 27, 2025, members of the suspected robbery crew were overheard discussing Spence Diamonds as their next intended target (Suspicious Circumstance Report File 560007). Langley RCMP has been advised however confirmation of follow-up action is recommended given the assessed imminence of this threat.

The sixth recommendation is that the DNA analysis from the blood sample collected at the scene of Robbery 6 on May 20, 2025 be expedited (Robbery Report File 559501). A confirmed DNA match through the National DNA Databank would constitute direct physical evidence linking a suspect to the series and would significantly strengthen any future prosecution.

Finally, a financial investigation into Gold Exchange BC Ltd. and its subsidiaries Cashfast Money Exchange, The Vault and Hawg Wyld Custom Bikes Ltd. is recommended. SMITH's shared registered business phone with HAWG and his observed presence at The Vault for approximately four hours on May 5, 2025

Information contained herein is CONFIDENTIAL and intended for law enforcement personnel only. Third Party Rule: Please contact the author prior to using this material.

suggests an undisclosed association with HAWG's business network (SMITH Profile; HAWG Profile; BC Corporate Registry). This investigation may also bring to light further connections to the Demon Riders Outlaw Motorcycle Gang and the broader criminal organization supporting the robbery series.
